Global scope

Over 80,000 people sat PRINCE2 exams in 70 countries through the APM Group in 2008. Uptake of the methodology continues to grow and develop.

What is PRINCE2?

PRINCE2 is a scalable, flexible project management method designed to provide a framework covering most disciplines and projects. PRINCE (PROjects IN Controlled Environments) is a structured method for effective project management. PRINCE2 offers best-practice guidance on project management for projects of any size.

It is a *de facto* project management standard used extensively by public and private sectors in the UK. PRINCE2 is rapidly becoming the standard in Australia.

Key Features

PRINCE2 is designed to be used on any type of project in any environment. It contains a complete set of concepts and project management processes which are the minimum requirements for a properly run and managed project.

The key features of PRINCE2 are:

- Focus on business justification
- A defined organisation structure for the Project Management Team
- Product-based planning approach
- Emphasis on dividing the project into manageable and controllable stages
- Flexibility to be applied at any level appropriate to a project.
