

PRINCE2 Agile® provides guidance on how to apply agile methods to the world's most recognised project management method. You can start with the Foundation course or use PRINCE2 as a Practitioner course pre-requisite.

PRINCE2 is fully compatible with agile delivery approaches. PRINCE2 Agile supports projects with PRINCE2 and work packages with agile methods. PRINCE2 work packages can be tailored with agile approaches.

Training Course Objective

We examine how PRINCE2 and agile methods can interact and be adapted to support each other in order to benefit the overall management of projects. It will help experienced PRINCE2 users to tailor management controls for agile development.

- Understand common agile ways of working
- Understand the purpose and context for combining PRINCE2 and the agile way of working
- Be able to apply and evaluate the focus areas to a project in an agile context
- Be able to fix and flex the six aspects of a project in an agile context
- Be able to apply or tailor the PRINCE2 principles, themes, processes and management products to a project in an agile context
